Farra For Representative.

The announcement of Mr. John M Farra as a candidate for the Legislature, subject to the action of the democratic party is in this issue of the Record. He has not before been a candidate for office and did not consent for his friends to authorize his candidacy until he had been solicited by many persons from all parts of the county and had been presented with a petition containing the names of about one hundred democrats requesting him to be a candidate for the nomination. How well qualified is Mr. Farra for this important office is too well known to the people for special mention. Mr. Farra is a farmer, a gentleman of the highest moral character, possessing a liberal education, broad minded and good ideas and is chucked full of the progressive spirit of the times and is a democrat to the core. He is well prepared to represent Garrard County in the General Assembly and will prove a popular candidate.

Good Roads.

Much has been said by press and public on the above subject, and as a usual thing the discussion referred to turnpikes and their construction and maintainence. This article is intended to deal solely with county roads, dirt roads, or as they are usually found this time of year "mud roads."

First let us have a look at the law governing them, as appplies in Garrard county. The Kentucky Statutes call a primary to select a candidate for

How many even keep nati has been indicted for perjury, and your roads in proper shape for travel? afterward cited for contempt of court Very few we will venture to say. The average overseer and the hands in his precinct look upon the working of a county road very much as they would npon an aching tooth that must be pulled, a disagreable duty to be performed, the sooner over with the bet-

The majority of the roads are worked in the following manner: choosing the day when the farmers have least to do, they are summond to work the road on a certain day, they begin to straggle in on that day about seven o'clock, and by ten most of them are there, they scratch around with pick and shovel, throw a little loose dirt here and there into the middle of the road. there to be converted into a mud hole by the first rain, probably, if it is handy, throw on a few loose rocks, and along toward the middle of the afternoon call it a day. No ditching, no filling of ruts or mud holes left from last winter, nothing but put in the time. Sometimes this is repeated the second day, but never more than two days of the year.

The consequence of this careless put ting in of the time on the roads, for it cannot be called working them, is that these same people, when they haul their crops to market, get stalled or mired in their road, then you will witness some tall swearing and abuse of county roads in general and this one in particular, but the road is worked the following year in the very same manner.

Now this could be very easily remedied, and no one would reap a greater benefit from the proper working of the roads than these very people who work them, or should work them.

Overseers should summon their men to appear at 7 o'clock and see to it fixed, ditches dug and the road propernearly always sufficient rock can be the use of his stricken left side. gathered along the road for this purpose, overhaul that old last winter

Quality Not Quantity.

Now that the "cut out" question has practically been disposed of, we deem it not amiss to offer a few suggestions to the tobacco growers of the county. The sentiment throughout the state

seems for a reduced acreage this year, and while every farmer is free to folow his own inclination in the matter, we think that the holding down of the production will aid materially in securing a better price for the 1911 crop.

Many growers returning from the breaks and loose leaf markets have told the Record that tobacco was bringing a good price, considering the quality, that it was undoubtedly the poorest crop they ever saw offered for sale in
